

HOW MINERS ARE PREPARED FOR WAR

HAVE BEEN STRENGTHENING UP THEIR TREASURY IN PREPARATION FOR THE PRESENT GREAT EMERGENCY—HOW THE MONEY IS SPENT DURING A STRIKE—A HUGE ARMY IN NUMBERS.

Indianapolis, Ind., Feb. 8.—The coming on April 1 of a great national coal strike has centered the attention of thousands of wage earners and the owners of millions of dollars' worth of coal mining properties upon the headquarters of the United Mine Workers of America in this city.

It will be the first time in the history of the U. M. W. that the anthracite and bituminous miners have entered upon a great strike together.

That the powerful organizations of mine operators will find in the United Mine Workers a foe worthy of their steel, is shown by three facts.

Numerically, the U. M. W. is the strongest body of workmen in the world engaged in a single industry.

Financially, it is the strongest union of labor in the United States, ranking second in the world only to the Amalgamated Engineers of Great Britain, a much older organization.

As an organization, which reaches into twenty-five mining states and territories and into British Columbia, it has become welded together by repeated battles.

For more than a year preparations for a long, stern fight have been under way in the miners' great union. President Mitchell and Vice President Lewis have occupied nearly all the time in strengthening the organization.

In the meantime, W. B. Wilson, secretary-treasurer, has been wrestling with the great financial problems presented by the likelihood of a long, continued strike. The gathering of the immense funds necessary to support the members while out of employment, the plans for their equitable distribution with the least possible waste—these are the duties which make the office of the secretary-treasurer one of the most important of all in a great labor organization, when a vital contest is expected.

Latest reports received by Mr. Wilson show that United Mine Workers now has over 330,000 members, against a membership of but a few hundred when the order was formed in 1890 by the amalgamation of the Miners' Progressive union and the Knights of Labor. Of the above number, which includes those who have been excluded from the payment of dues through idleness and other causes, something less than 100,000 are in the anthracite coal regions.

The amount of money contributed by this body of men each year for the maintenance of their national organization is close to \$1,000,000. Last year the income of the United Mine Workers was \$852,772. At the beginning of the present fiscal year there was a reserve on hand of \$603,952. This has since been largely increased. During the last year the organization paid out for aid to strikers, \$1,067,300, a part of which was taken from the reserve.

In explaining how the income is derived, Treasurer Wilson said: "The manner in which the United Mine Workers of America raises funds for the transaction of its business is by a not per capita tax of twenty-five cents per month per member. In special

emergencies assessments are levied in addition to this.

"The assessment during the anthracite strike in 1902 was 10 per cent of the gross earnings of the bituminous miners."

In addition to this, it was stated that many of the locals have funds of their own, not included in the aggregate of the national organization.

A strike of all coal miners in the country will cut off all the capita receipts. The U. M. W., however, has contrived in aid of strikers in other unions, and could, no doubt, count on liberal assistance. During the anthracite strike in 1902, outside organizations contributed \$49,000. Much more than that is expected in the present emergency.

During the strike the international executive board of the U. M. W. will have absolute power as to the distribution of funds. The board is composed of twenty-five members, including representatives from each of the twenty-two districts, and the national president, vice president and secretary-treasurer. To make any check valid the signatures of a majority of the members of the board are necessary.

"When a strike occurs," said Treasurer Wilson, "the men involved are supported in proportion to the size of their families. No money is paid directly to the strikers, but they are furnished with the necessary provisions to sustain them until the strike is over. The amount of money available for strike purposes is distributed through the twenty-two districts and the 2,700 locals.

"We have two methods of distribution, depending upon the local conditions. During the anthracite strike orders were issued on the retail dealers. The face of these orders bore the amount of supplies they were to furnish. On the back of each slip was a space for the articles purchased and the price of each. When used by the orders were signed by the party to whom issued and by the grocer who furnished the supplies. The orders were then turned over by the local to the district treasurers once every week and were cashed.

"Where the company stores are in operation we find it necessary to go into the open market and purchase supplies by the car load. We then establish our own commissaries."

HYOMEI CURES CATARRH.

Its Healing Balsams Kill All Catarrhal Germs—Sold Under Guarantee by J. H. O'Reilly & Co.

It is a noteworthy fact that among the many medicines and treatments for catarrh, there is only one which J. H. O'Reilly & Co. sell under their positive guarantee to refund the money if it does not cure—Hyomei. Nature's remedy for the cure of catarrh.

No dangerous drugs are taken into the stomach when Hyomei is used. Breathed through the small pocket inhaler that comes with every Hyomei outfit, its healing balsams penetrate to the most remote cells of the throat, nose and lungs, and the germ of catarrh, healing the irritated mucous membrane, and making complete and lasting cures.

The complete Hyomei outfit, consisting of an inhaler that can be carried in the purse or vest pocket, a medicine dropper, and a bottle of Hyomei costs only \$1. The inhaler will last a lifetime, while extra bottles of Hyomei can be procured, whenever needed, for only 50 cents.

TRIP FOR FROZEN WATER

Use of Government Cutter Will Make the Expedition More Profitable.

New York, Feb. 8.—The two famous Arctic explorers, Nordenskjold and Mikkelson, were the guests of the Arctic Club and the Explorers' Club, at a joint dinner of the two clubs in this city last night.

Mr. Mikkelson will make his headquarters in Brooklyn for a few weeks, while he is collecting funds for an expedition to the Beaufort Sea, an unexplored area west of the Parry archipelago. Mr. Mikkelson plans to leave San Francisco some time in April. He will then go to the mouth of the Mackenzie River. He hopes that the government will place at his disposal a small revenue cutter, but if not, he will sail on one of the whalers, which annually go north to Behring Strait.

On reaching Behring Strait, Mr. Mikkelson will turn west, and spend some time along the Siberian coast, where he will buy dogs, kayaks and Siberian ponies. The other members of the party will go by a more direct route, through Canada, and will meet Mr. Mikkelson at the mouth of the Mackenzie some time in August. The continuation of the expedition will be governed largely by the kind of vessel at the party's disposal.

ORIGINATOR OF ALASKA YUKON EXPOSITION IDEA

Geoffrey Chaulander's Chance Suggestion Leads to Enterprises That Will Rival Lewis and Clark Fair.

Seattle, Wash., Feb. 8.—Geoffrey Chaulander, one of the best posted men on Alaskan affairs in the north, is the originator of the Alaska-Yukon enterprise. Recently he suggested to friends in Seattle that an exposition be held here to commemorate the 40th anniversary of the accession of the territory to the domain of Uncle Sam. The idea was taken up instantly. The local chamber of commerce and those of every city in Alaska endorsed the project. Chaulander was designated "Commissioner for the Alaska-Yukon Exposition." Under the auspices of the local Alaska Club he visited every center of population in Alaska—both American and British, and found that the exposition idea was favored everywhere.

The date of the exposition has recently been changed from 1907 to 1906, because the tricentennial of the landing of the English at Jamestown is to be celebrated the former year.

It is contemplated to hold an exposition almost, if not quite, as pretentious as the Lewis and Clark Exposition, held at Portland in 1905.
